

Diagnostic Assessments and Neuropsychological Evaluations for Children

Serving the Needs of Children in the Delaware Valley

Early Diagnosis – Better Care

Bancroft offers expert evaluations for children, leading to a formal diagnosis and better care. Getting an early diagnosis can help facilitate the best care and a lifetime of appropriate services.

Removing Barriers that Impede Success

Diagnostic assessment is part of a new suite of autism treatment services Bancroft has designed to meet the growing demand brought on by:

- The increase in autism diagnosis
- Long wait times for diagnosis
- Access to appropriate services

The goal: Provide an early diagnosis allowing for access to services and the best chance of success.

Services Offered

- Diagnostic Autism Assessment
- Diagnostic ADHD Assessment
- Full Pediatric Neuropsychological Evaluations
- Psycho-Educational/Learning Evaluations

Experience Matters

Bancroft's experience in treating those with autism and intellectual and developmental disabilities runs deep. We have over 100 years of experience in treating those with autism. The continuum of care begins here.

Danielle Ager, Psy.D.
Neuropsychologist

Dr. Ager is a licensed clinical neuropsychologist who completed an APA-accredited internship through Widener University with rotations at Lankenau Hospital. She completed a postdoctoral fellowship at Mount Washington Pediatric Hospital where she provided neuropsychological evaluations in a subacute rehabilitation hospital setting.

Prior to joining Bancroft, Dr. Ager worked as a lifespan neuropsychologist for 7 years at Clinical Neuropsychology Associates, providing neuropsychological and psychoeducational evaluations, cognitive rehabilitation, and psychotherapy for individuals with concussions, learning disabilities, ADHD, and other neurological and neurodevelopmental conditions.

At Bancroft NeuroRehab, Dr. Ager conducts evaluations and provides treatment to individuals with a wide range of neurological conditions.
