

About Bancroft NeuroRehab

Bancroft NeuroRehab is a premier provider of neurorehabilitation services in the region, helping individuals reclaim their lives following a brain injury or other neurological condition. At each of our three New Jersey locations, an expert team of clinicians works to build on each client's success toward the most independent life possible.

Let us help you rebound, recover and reconnect.

All Bancroft NeuroRehab programs are accredited by the Commission on the Accreditation of Rehabilitation Facilities (CARF), an international, nonprofit evaluator of consistent quality and effectiveness of health and human services.

Experts in Brain Injury Rehabilitation

When you or a loved one has a traumatic brain injury or neurological disorder, the choice you make for rehabilitation can make all the difference in the world...and the future.

For over 30 years, Bancroft NeuroRehab has been a leader in helping people recover from traumatic brain injury and neurological conditions. Our reputation is built on successful outcomes, client satisfaction and a continuum of care to match each patient's distinct needs.

Every Person and Treatment Plan is Unique

Treatment is tailored to the individual and supervised by a team of neurological rehabilitation experts. The goal is always the same: To help the patient relearn skills affected by illness or injury, recover, and reconnect with their life.

Conditions treated include:

- Traumatic Brain Injury
- Concussion
- Anoxic or Hypoxic Brain Injury
- Gait and Balance Disorders
- Stroke
- Parkinson's Disease
- Multiple Sclerosis
- Post-Surgical Neurological Challenges
- Persistent COVID-19 Symptoms

Outpatient Services

Each member of the clinical team specializes in helping people recover from their unique brain injury, stroke, concussion or neurological condition. Clinicians' certifications include Brain Injury Specialists (CBIS) and board certification in neurologic physical therapy (NCS) and clinical neuropsychology (ABPP).

- **Physical Therapy** restores mobility, and improves muscle tone, balance, strength and endurance.
- **Occupational Therapy** restores skills needed to function successfully at home, work or school.
- **Psychotherapy** aids in adjustment to injury, deficit awareness, redevelopment of social skills, maintaining relationships and education regarding the illness or injury.
- **Speech and Language Therapy** improves communication and language skills and swallowing.
- **Vestibular Therapy** improves balance and reduces dizziness through exercise.
- **Parkinson's Disease Therapies** improve gait, mobility and speech. Specific programs may include LSVT Big & Loud Therapy®, PWR!Moves® or SPEAK OUT!®
- **Vision Therapy** improves fundamental visual skills and abilities to support the connection of the eyes to the brain.

Evaluations and Examinations

Essential to the development of customized treatment plans for neurological rehabilitation, Bancroft NeuroRehab offers:

- **Neuropsychological Evaluations** gauge the level of functionality in orientation, attention and language.
- **Independent Medical Examinations** determine the cause, extent and medical treatment of an injury.
- **Pre-Vocational Cognitive Evaluations** identify physical, emotional, behavioral, cognitive and vocation assets or barriers to employment.

Funding Solutions

Payment for outpatient services depends on each individual's situation. Coverage by private health insurance varies by diagnosis and insurance carrier. If there is no identified funder, you may also pay privately for services.
