

Hope Beyond Limits

## Unlocking More Possibilities in Recovery

*All Bancroft NeuroRehab programs are accredited by the Commission on the Accreditation of Rehabilitation Facilities (CARF), an international, nonprofit evaluator of consistent quality and effectiveness of health and human services.*

### How We Help Stroke Survivors Recover

**At Bancroft NeuroRehab, our expert team provides individualized rehabilitation plans tailored to stroke recovery.**

Our approach includes:

- **Physical Therapy:** Improve strength, balance, mobility and endurance with techniques like high-intensity gait training (HIGT) and fall prevention strategies.
- **Occupational Therapy:** Relearn daily activities like dressing, cooking and personal care. We provide upper extremity function training and adaptive equipment support.
- **Speech Therapy:** Address communication challenges, swallowing difficulties and cognitive deficits like memory and executive functioning. Our team includes clinicians certified in SPEAK OUT! and VitalStim.
- **Cognitive Rehabilitation:** Strengthen memory, attention and problem-solving skills to improve overall independence.
- **Psychological and Emotional Support:** Our therapists provide counseling and social support to help survivors and caregivers cope with changes.
- **Residential Rehabilitation:** Practice new skills in a supportive group-home or apartment. Our trained staff provides 24/7 individualized care, supervision, and social activities to foster independence.

## Partner Spotlight: Vivistim Paired VNS Therapy

**Vivistim® Paired VNS™ Therapy is a breakthrough technology designed to help stroke survivors regain hand and arm function.**

By pairing rehabilitation exercises with gentle vagus nerve stimulation, Vivistim helps the brain rewire and strengthen neural pathways, improving motor recovery.

- Clinically proven to promote up to 3 times more improvement in upper limb function compared to therapy alone.
- FDA-approved and backed by research demonstrating long term benefits.
- Designed for stroke survivors at least six months post-stroke with moderate to severe upper limb impairment.

## The Bancroft NeuroRehab Difference

- **Individualized Treatment:** One-on-one sessions with an interdisciplinary team of stroke-rehabilitation experts.
- **Certified Specialists:** Our clinicians hold certifications in stroke rehabilitation (CSRS, NCS, CBIS, ABPP in Clinical Neuropsychology).
- **Community of Care:** We support every stage of recovery, from outpatient rehabilitation and day programs to community-based services.
- **Life Goals and Beyond:** Assistance with returning to work, hobbies, or family activities.
- **Maintenance Therapy:** Ongoing support to help prevent functional decline.
- **Insurance-Friendly:** Most insurance plans are accepted.
